Graduate Student to Present at Posters on the Hill

March 22, 2021

Amanda Weaver, a recent graduate of the BS Mechanical Engineering program and current graduate student in the MS Mechanical Engineering program, has been accepted to present her research “Hydrogen for Aerospace Travel: The new Climate Change Mitigation Technology,” at the Council on Undergraduate Research’s (CUR) Posters on the Hill 2021. The event will take place virtually on April 27 and 28, 2021.

Posters on the Hill is CUR’s signature advocacy event giving students — and their mentors — the opportunity to showcase their research and advocate for undergraduate research at the federal level by engaging in discussions with their members of the U.S. Congress.

Ms. Weaver’s faculty mentor is Dr. Valentin Soloiu, Professor of Mechanical Engineering and Allen E. Paulson Distinguished Chair of Renewable Energy.
